How to make bose soundbar remote universal

Most newer devices with HDMI feature CEC (Consumer Electronics Control). If your system and other devices (i.e. TV, Blu-ray, cable box, etc.) are connected using HDMI cables, look in the menus of each device for HDMI-CEC options. When enabled, remotes for those devices might control volume, mute, and power for your system. (Tip: Depending on the brand, CEC may be referred by a different name in the device menu. For more info, see Names used by different brands for CEC.) Program a universal remote to control your speaker. Your speaker cannot be controlled by remotes that use RF (radio frequency) commands. Refer to the programming instructions for the universal remotes to control or fully control all devices.) Teach your system the Volume and Mute commands of another remote You can teach your speaker to recognize the Volume and Mute controls of a remote that sends IR (infrared) commands—even if it's not a universal remote, press and hold the TV button until the TV and Bluetooth® lights on the speaker blink three times and then glow white Tip: The speaker is in programming mode while the lights glow white. If they stop glowing white, repeat this step and try again Press the Volume + button On the remote with which you want to control your Bose system, press and hold the Volume Up button until your speaker plays a tone: If the TV light on your speaker blinks amber twice then glows white, it learned the command. Try again. If it doesn't work after a few tries, the speaker cannot learn the commands of that particular remote Repeat steps 2 - 3 using the Volume Down buttons on the remotes Repeat steps 2 - 3 using the Mute buttons on the remotes. Control power on automatically when sound is present, see Turning auto-wake on or off. Your system will also power off automatically after 20 minutes without interaction. PLEASE NOTE THIS PRODUCT IS NOT AVAILABLE IN ALL STORES BUT CAN BE ORDERED The Bose Soundbar Universal Remote control it with this remote. So say goodbye to your cluttered coffee table and trying to figure out which remote goes with which device—all you need is this one. Included with the Bose Soundbar 700. Optional accessory for the Bose Soundbar 700. And thanks to ingenious contextual backlighting, you can. The Bose Universal Soundbar Remote only shows you buttons relevant to the task at hand. Whether you're listening to music or watching TV, the remote automatically adjusts itself to light up the buttons again. Looks good. Feels better. You know quality when you see it, so ditch the scientific calculator look, because this is a remote that you'll be proud to display. Designed to be sleek with a premium aluminium accent and seamless elastomer keypad that's soft to the eye, it feels great in your hand, too. Brand Bose Product Type Universal Remote Model Number 809945-0010 Bose Soundbar Universal Remote is rated 2.2 out of 5 by 67. Rated 2 out of 5 by JayDOhh from Bose designers failed [This review was collected as part of a promotion.] The folks who designed this clearly failed to watch people of all generations use this. The lighted keys are nice but the back lights are on for microseconds. Or you need to shake it and read it concurrently. I looked for a setting to increase the time that they are backlit. Nope. The buttons don't give a lot of tactile feedback like other remotes. And you have to learn some new icons. Wish they could provide this capability over a Smartphone app. Why not add an IR transmitter to the sound bar so it could operate Bluetooth from remote to sound bar, then IR from sound bar to TV and cable box Date published: 2018-11-25 Rated 4 out of 5 by Jerry from Works great for my soundbar 500! [This review was collected as part of a promotion.] I purchased the Bose universal remote for my Bose Soundbar 500 as that remote was very limiting. I was very skeptical due to all of the negative reviews but I took a chance. I have a 2019 Samsung 6 series 4k tv and an Apple 4k tv plus a Xbox One X. The reason for the deduction is the backlight does not stay on long. Since this remote is setup via the app you should be able to control how long the backlighting stays on. Hopefully there could be an update for that otherwise I personally like the extra weight of the remote and the feel and look. Date published: 2019-05-16 Rated 2 out of 5 by jketoney from Great when backlighting is on. [This review was collected as part of a promotion.] I am excited to replace three remotes with one. I am sad to say that the backlighting issue about which Bose customers have been writing negative reviews for years now has *still* not been addressed. Truly the backlighting is on for microseconds. With arthritic hands, it has been frustrating to "break in" our new remote. Despite a great design and compatibility, the backlighting issue is of serious concern. Please, Bose, at the very least address your customers' concerns here or on the Bose community support pages. Date published: 2020-06-22 Rated 4 out of 5 by R17MNY from Great When you fathom out what does what. [This review was collected as part of a promotion.] This came with my BOSE 700 soundbar. Great it thought this will get rid of my numerous remotes. So i begun on the arduous task of setting the control up, to my surprise it was simple. However it is a re-education on what buttons functions it is great. Quality wise it is as you would have expected from BOSE, fantastic! The only drawback is it shows every fingerprint. The only other fault i found is like other people have mentioned, is the length of time the backlight stays on. Overall a great product with my setup Date published: 2020-05-01 Rated 1 out of 5 by Turbo Frontier from It appears to not work I bought the sound bar 700 and it came with this remote. The sound bar 700 is absolutely fantastic and worth every penny. But I was disappointed by the quality of the remote once when following the step by step instructions and using the Bose Music app. After doing a few resets, it still don't work. And don't get me started on pairing it with the tv. I teach physics and I find reading about special relativity more conceptually attainable than figuring out and troubleshooting pairing the remote with any other device beside the sound bar. Date published: 2020-07-26 Rated 3 out of 5 by asc1939 from Great remote ruin by short time illuminations [This review was collected as part of a promotion.] Title says it all. An infuriating remote as the lights extinguish before you can select the buttons, especially with using for satellite that needs often several buttons and learning where what function is, there is not enough time to check. It is small things like this that ruin the pleasure of using what could be high quality units. Shame this is not considered important enough to resolve or provide a user option. I would not mind the extra cost of battery replacement more often to get this option/time increased. Date published: 2020-07-10 Rated 1 out of 5 by Boseyou and obetter from Lights dont stay on long enough [This review was collected as part of a promotion.] Such a shame, this is such a premium remote but the fact that the timing of the back lights can't be adjusted makes it unusable. They claim it stays on for three seconds, but I can assure you it is not nearly long enough and will drive you absolutely nuts. Date published: 2019-06-30 Rated 1 out of 5 by Faith725 from Isn't prepared for newer smart TVs [This review was collected as part of a promotion.] Bought the sound bar to go with our Insignia ROKU tv. The codes for insignia do not work, because it is a SMKU two designs and the ROKU two designs are the review was collected as part of a promotion.] attached. The only thing we can use this remote for is the sound bar itself. I wish there were an app for this then I could have all my devices on my phone instead of keeping up with remote were better. Date published: 2018-12-26 We aim to dispatch orders within 2 days. Delivery costs are calculated based on your location and the size of your order. Some goods may take longer to deliver if a product is currently not in stock. A staff member will contact you where this occurs. Easy returns If you feel your product has failed a Consumer Guarantee (as defined by New Zealand Consumer Law) then don't worry you can easily return it to your local Harvey Norman store. We'll even pay for the postage if you live in an area where there is no store. Our returns policy covers any purchased item (conditions apply). With Product CareTM you can relax knowing Your purchase comes with additional protection. Discover all the benefits Product CareTM term, your product fails to operate as a result of an Eligible Fault*, we will provide a one-off replacement of Your Product.
